Jl. H. Kasam No 10 A, RT.4/RW.4, South Meruya, West Jakarta City, Special Capital Region of Jakarta 11650

I am a Computer Science student with a solid foundation in programming, data structures, databases, and web development. Through coursework, I've worked with C++, Java, Python, SQL, HTML/CSS, and Git, and I continue to build on these skills through personal projects.
I'm interested in software development and open to exploring different areas of the field, whether that's building applications, working with data, or supporting systems and infrastructure.
Currently seeking an internship where I can contribute to real projects and develop as a professional.
